

## ENTERPRISE REPORTING FOR FINANCIAL SERVICES

DIO-soft creates flexible reporting solutions for clients in the financial services industry, giving them a competitive advantage with a constant flow of essential business data, statistics and analytics.

### Our Focus

DIO-soft can lower the cost of corporate reporting programs through customized, affordable consulting and support packages that deliver consistent, reliable results.

#### Reporting Systems

- Implementation
- Migration
- Support

#### Data

- Deep source data analysis
- Database design
- Data warehouse design

### Reporting System Migrations

Reporting2Jasper is an online application that converts Actuate and PowerBuilder reports to the critically acclaimed Jasper platform while reducing cost, minimizing risk and improving reporting conversion process.

### Take Advantage of Big Data

Set goals and create a Big Data plan by embarking on a discovery process. In order to leverage data, you need to get a good handle on what data you already have, where it is, who owns and controls it, and how it's currently being used. Are there any third-party data sources that your company relies on? Dig deep—you'll gain more insight from creating a bigger picture.

# DIO-soft

## Intelligent Solutions

### DIO-soft Delivers Results
